DR. GARY J. MERLINO & DR. ALEJANDRO DEL VALLE PRIVAMEDIS

Dr. Merlino and Dr. Del Valle, who oversee a practice of 18 doctors, are at the helm of several medical divisions: one established for concierge care, one hospitalist service, and the last dedicated to primary care and aesthetics. PrivaMedis Concierge Medical was founded when Dr. Merlino and Dr. Del Valle felt a need to establish a practice featuring 24/7 care focusing on preventative medicine and wellness, and personalized hospital care. For them, concierge practice was a way to reconnect with patients and offer continual support. The two doctors also lead a hospitalist company (Beach Medical Associates) with its own team of physicians available 24 hours a day at Mount Sinai Medical Center, benefiting patients with personalized admission and hospital care. Lastly, PrivaMedis Aesthetics and Wellness Institute was created to provide patients with the latest aesthetics treatments—from Botox to stemcell treatments—in a safe medical environment. “Dr. Del Valle and I feel the same way about medicine,” says Dr. Merlino. “We’re both really enjoy a good relationship with patients. Getting a thank you text from a patient means a lot to us.”

Areas of Specialty

When a specialist is needed for a Concierge Medical patient, care does not stop at the referral—the advocacy continues as the Concierge Medical doctor communicates with the specialist and determines the best care plan for the patient.
